

## **IF—Instructional Approach**

Instruction will be focused on meeting the instructional needs of students with different talents, interests, and development.

The instructional program will include:

- Procedures for diagnosing learning needs
- Methods and strategies for teaching that incorporate learning needs
- Resource-based learning opportunities
- Techniques for the evaluation of student outcomes
- The provision of remedial instruction as needed

All instruction will reflect the acknowledgment of diversity and respect for differences. Instruction will also include, where possible, consideration of all available community resources, including but not limited to organizations, businesses, talented individuals, natural resources, and technology to engage each student in achieving the necessary skill and knowledge.

Students will be encouraged to participate in year-round learning.
