We deliver quality & more than just cleaning

We take our definition of quality commercial cleaning, overlay our measurement of it, and then make sure we deliver it using the most advanced products and equipment available, including:

- Microfiber cloths designed to trap dirt and hold it in a positively charged state for more effective cleaning; these cloths are also color-coded to eliminate cross-contamination
- Backpack vacuums with four filters and ratings that exceed HEPA standards for clean air
- Cleaning chemicals that cover a greater area while using less product – our “cleaning greener” initiative
- Hospital strength disinfectants for broad spectrum coverage

Microfiber Technology

Moonshine has replaced conventional cleaning cloths with an anti-microbial impregnated micro-fiber system, which cleans greener and dryer while removing more dust contaminants. Moonshine uses a four-color coded microfiber system, which virtually eliminates cross-contamination. A highlight of this approach is that the red microfiber cloths are only used for disinfecting restrooms, which reduces the spread of germs and harmful bacteria to other areas of your property. Our microfiber mops also work efficiently to clean and disinfect floor surfaces with fewer chemicals and faster results.

- Microfiber is 1/16 the size of a human hair and holds eight times its weight in water.
- The tiny fibers penetrate the microscopic pores of surfaces increasing cleaning quality and saving time in the process.
- Microfiber is positively charged and literally removes 100% of all dust particles.

Back-Pack Vacuum Technology

Moonshine operators are trained to exclusively use our approved backpack vacuums, which use a four-part HEPA filter system. This removes up to 99.9% of particles up to the size of 0.3 microns from the inside air. Unlike beater bar vacuums that spread dust and dirt into the air, the Moonshine system *removes* it. These powerful vacuums:

- Capture up to 99% of dust mites, pollen, viruses, bacteria and chemical residue
- Leave less dust in your environment, so there is less dust to collect on equipment and furniture
- Help reduce the risk of respiratory infection
- Create a healthier environment for your property and its occupants
