

EBCD—Weather-Related and Emergency Closings

The decision to delay opening of school, cancel school for the day, or to dismiss school early will be made by the Administrator.

Weather-related closings will include temperatures of -20 degrees Fahrenheit (considering wind chill factors).

School days cancelled due to weather shall be made up: first, from calendar days set aside in anticipation of possible closings; second, by cancelling vacation days; and third, by adding the necessary number of days to the end of the school year.
