

## **JIB—Student Involvement in Decision Making**

A primary task of the School is to create a stimulating learning climate that develops active involvement of students in their education and develops a spirit of inquiry. This climate is created when students work together with school staff in such activities as planning and evaluating school programs.

To this end, the School encourages student involvement that will enhance:

- Achievement of the course goals, improvement of the courses of study, and planning of classroom activities.
- Freedom of expression, recognizing that every privilege and right has a corresponding responsibility.
- Student participation in assembly programs and school-sponsored forums of interest.
- Participation in student government organizations that provide students with a voice in school affairs.
- Co-curricular or extracurricular activities that broaden their educational experiences.
